EDUCATION

Auburn University at Montgomery – College of Business, Montgomery, AL
Master of Science in Management Information Systems

Aug 2021 – May 2023

Related Coursework: Data Analytics for Competitive Advantage, Enterprise Information Systems, Quality Management and Integrated Systems, Information Security, Innovation Strategy, Applied Business and Data Analytics, System Analysis, Design and Implementation, Data Analysis for Managers, Lead Innovative Product Design and Prototyping.

TECHNICAL SKILLS

Software and languages: Intune, Azure, SQL, Python, MS Office, Word, Excel, Tableau, PowerBI.

Skills: Customer Service, Technical Support, Troubleshooting, Inventory Control, Testing, Auditing, Risk Management, Active Directory, Incident Management, IT operations, ITSM, Database Management, Compliance, Managing tickets, Customer Relation Management,

EXPERIENCE

Desktop Support Engineer, Tech Mahindra – Suffolk, VA

Nov 2023 – Present

- Manage IT operations by addressing daily IT-related issues and resolving high-priority tickets using ITSM practices while adhering to SLA and OLA compliance standards.
- Oversee procurement, tracking, and reporting of IT hardware through CDW, ensuring accurate records in database and maintaining efficient inventory control.
- Collaborate with cross-functional teams to enhance customer service by streamlining onboarding processes and optimizing asset management workflows.
- Ensure organizational compliance with IT asset lifecycle policies, supporting audits and refining processes to maintain operational efficiency.
- Provide technical support for server installations, SAP escalations, and network equipment setups, contributing to reliable IT operations across locations.

End User Support Intern, ICS Global Soft – Irving, TX

Jun 2023 – Nov 2023

- Provided IT Service Desk support to a large workforce, managing tickets for break-fix issues, account administration, and hardware/software requests while ensuring compliance with ITSM standards.
- Monitored employee accounts, deployed end-user devices, and participated in Intune Deployment team to ensure device compliance and lifecycle management.
- Documented processes for first-line support and collaborated with senior staff to address project issues, improving workflows and customer service.
- Conducted hardware inventory audits and maintained accurate asset records in database, ensuring compliance with asset management policies.
- Supported IT hardware lifecycle processes, including procurement, deployment, and disposal, to optimize IT operations efficiency.

Service Desk Support, Accenture – Hyderabad, India

Nov 2020 – Aug 2021

- Managed break-fix and installation of computers at TA Instruments' primary facility, supporting research, service, administration, manufacturing, and global sales teams.
- Administered user accounts across Active Directory, Office 365, and Kantech ADT systems, with experience in Azure Active Directory and ADFS troubleshooting.
- Advised company integrations, ensuring smooth transitions during facility relocations and IT infrastructure changes.
- Facilitated computer disposal processes, adhering to safety, environmental, and compliance standards.
- Coordinated IT asset lifecycle management, including procurement and decommissioning, to optimize resource utilization and maintain inventory accuracy.

Engineering Intern, Lampex Electronics Limited – Hyderabad, India

Jun 2019 – Sep 2019

- Assisted in manufacturing and development of LCD modules, LED displays, semiconductors, and embedded systems.
- Supported software development for embedded systems, contributing to application segments for global markets.
- Collaborated with cross-functional teams to optimize product performance and quality at cost-effective prices.
- Gained hands-on experience with semiconductor technology and its integration into various consumer electronics applications.
- Contributed to product testing and troubleshooting to ensure high standards of quality control.

PROJECTS

Data-Driven Strategy for Enhancing Product Development and Information Security

Aug 2022 – Dec 2022

- Analyzed market and customer data to identify product opportunities using predictive analytics.
- Designed and integrated enterprise systems (CRM, ERP) to streamline product development.
- Applied quality management techniques for continuous product improvement.
- Led product innovation through design thinking and data insights, creating actionable prototypes.
- Created dashboards for performance monitoring and decision-making using data analytics tools (Python, Power BI, SQL).
- Developed and presented comprehensive findings, including security protocols and business insights.

Data-Driven Business Strategy for Customer Segmentation & Targeted Marketing

Jan 2023 – May 2023

- Analyzed customer demographics and purchasing behavior using clustering techniques (K-means, hierarchical) for effective segmentation.
- Applied time-series analysis and predictive modeling (regression, machine learning) to forecast sales and customer demand.
- Developed targeted marketing strategies based on customer segments, optimizing marketing spend and engagement.
- Created interactive dashboards in Power BI/Tableau to track KPIs and measure marketing campaign performance.
- Delivered business insights and actionable recommendations to senior management for data-driven decision-making.
